DISCLAIMER: This report has been prepared by the USDA/Foreign Agricultural Service in The Hague, The Netherlands for U.S. exporters of domestic food and agricultural product. While every possible care was taken in the preparation of this report, the information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their Belgian customer (importer), who is normally best equipped to research such matters with local authorities, before any goods are shipped. Final import approval of any product is subject to the importing country's rules and regulations as interpreted by border officials at the time of product entry.

Notes for using the Guide

Belgium, as a member of the EU, conforms to all EU regulations and directives. We therefore recommend that this report is read in conjunction with the EU Certification Guide produced by the US Mission to the EU in Brussels, Belgium: Gain Report Number : E35010
<http://www.fas.usda.gov/scripts/attacherep/default.asp>

Unfortunately for exporters, the EU's rules on certification for imports are complicated and are not always harmonized across Member States. This report lists the required export certificates for exports to Belgium, which are not yet harmonized.

Belgian Competent Authorities

Both veterinary inspection and food inspection are within the domain of the Federal Agency for Food Safety (FAVV). The FAVV belongs to the Ministry of Social Affairs, Health and Environment. The Federal Public Service Health, Food Chain Safety and Environment of this Ministry is in charge of policy and legislation on food issues. Regulation 2004/882/EC sets out the standards for control of compliance with the General Food Law (2002/178/EC).
